On 11/14 EPA will be hosting a regularly scheduled community focus group meeting for the Hartford Site. EPA, IEPA, Apex Oil, the Village of Hartford and key community members meet regularly to discuss the progress of the cleanup. In the past, the community has expressed frustration with the number of properties Apex Oil has purchased throughout the Village and this is a reoccurring topic. Apex, however, has stopped this practice some time ago and currently owns a footprint of property that will be necessary for future treatment infrastructure. Technical meetings will follow on 11/15 and 11/16.

Subject: FW: Significant Issues for Next Week

Let me know if you have any issues or activities (also updates to previous issues) at your facilities that you would like Joe to make Margaret aware of for next week. These should be issues that may rise to Division Director level over the next week. If you can send them to me by 3:00 pm, I'll combine them and forward them to Joe. Below is what I have so far, and also what I sent up last week:

This week:

- Techalloy (Union, IL) – need write up on groundwater plume and irrigation well.
- Hartford Hydrocarbon Plume (Hartford, IL) – Need write up on upcoming community meeting.

Last week:

- Wedron Groundwater Site (Wedron, IL) – On October 19th, a fact sheet on additional well contamination was mailed to Wedron residents. A letter is in sign-off to IEPA requesting that the state continue residential well sampling until final remedy is in place.
- Dow Reading, OH Control – A response to Congressman Wenstrup is in sign-off responding to his inquiry on EPA's review of Dow's request to terminate the existing RCRA 3013 Order.

Thanks,

Gregory A. Rudloff, Acting Chief
